

FilePool/FilePool/FileHandler.h

```
graph BT; FHcpp[FilePool/src/lib/FileHandler.cpp] --> FHh[FilePool/FilePool/FileHandler.h]; FMcpp[FilePool/src/lib/FileManager.cpp] --> FHh;
```

The diagram illustrates a header file relationship. At the top is a box labeled 'FilePool/FilePool/FileHandler.h'. Below it are two boxes: 'FilePool/src/lib/FileHandler.cpp' on the left and 'FilePool/src/lib/FileManager.cpp' on the right. Two blue arrows point from the bottom of each of these lower boxes up to the bottom of the top box, indicating that both source files include the header file.
