

```
Euclid::Table::CastVisitor  
< std::vector< VectorType  
  > >::operator()
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the C++ code for a function call: `Euclid::Table::CastVisitor` followed by a template argument list `< std::vector< VectorType` on the next line, and `> >::operator()` on the third line. A blue arrow points from the right side of this box to a white rectangular box on the right. This white box contains the text `std::vector::push_back`.

```
std::vector::push_back
```
